Precautionary measures for implementation of Rain water harvesting/recharge measures within industrial premises that are likely to cause pollution of groundwater

CGWA grants NOC for ground water abstraction to industries/infrastructure/mining projects with mandatory condition of rainwater harvesting/recharge as per the CGWA guidelines. In order to prevent pollution of ground water due to recharge, it has been decided that such industries which are likely to contaminate groundwater (as per the list given below), shall conserve roof top rain water only by constructing storage tank on the surface and shall not recharge within the premises. The stored water can be used by the industry.

List of Industries (Indicative)

| S.No | Name of Industries |
|------|---|
| 1 | Industries withdrawing saline groundwater |
| 2 | Textile & Dyeing |
| 3 | Explosive |
| 4 | Dairy plant |
| 5 | Chemical |
| 6 | Fertilizer |
| 7 | Enamel & paint |
| 8 | Pharmaceuticals |
| 9 | Pesticides |
| 10 | Tannery |
| 11 | Slaughter Houses |
| 12 | Pigments and dyes |
| 13 | Oil refinery/ petroleum products |
| 14 | Any other polluting industry |
